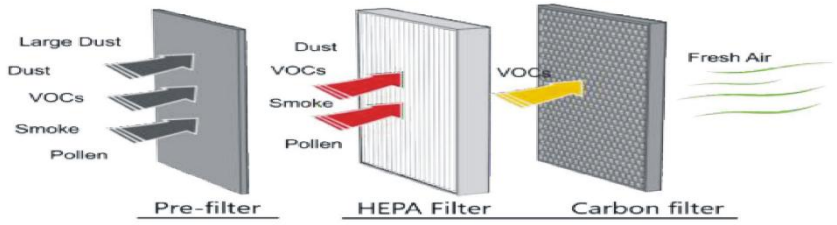
Fume Extractor

USTOOL™
US TOOL
Marketing & Innovation



Portable filter UST-5931FE1 for two desktop exhaust devices or hoses.
The filter is designed to clean the air from smoke and low concentration of dust.
Short-term use on welding, for example, in cases of carrying out small repair work is allowed.

Industries & applications

- Laboratories
- Non-permanent places of soldering and tinning
- Restoration workshop
- Repair unit Restrictions

The environment and the air to be cleaned must not be explosive and must not contain corrosive substances, gases, smoldering and self-transporting materials.

Features:

Simple and robust design
Lightweight, portability
220 V plug and play unit
Delivered with carbon filter
Compatible with two extraction arms or hoses of small diameters.
