

UST-FFL0020

Single Part Heavy -Duty Insulating Fiber Glass Ladder

Single Part Heavy-Duty Insulating Fiberglass Ladder - a robust and reliable solution for your elevated tasks. Crafted from durable fiberglass, this ladder requires no assembly, ensuring hassle-free use. With insulating properties for electrical safety and a heavy-duty design, it provides a secure platform for various applications. Non-slip rungs, secure grip handles, and compliance with safety standards make it the ideal choice for professionals seeking simplicity, durability, and safety in one compact package.

NB: Catalog images are standardized; variations may occur due to diverse models and customization.

Features:

- One-piece design without movable parts for simplicity and sturdiness.
- Designed to support the intended load without compromise.
- Resistant to corrosion, rust, and weather elements for durability in outdoor environments.
- Tailored for specific applications, such as electrical maintenance, painting, or other fixed-height tasks.
- Compliant with industry safety standards and regulations.
- Easy to carry and transport for versatile use

Standard Parameters:

Size	20 ft
Number of Sections	1
Overall Height (Reach Height)	22 ft
Safe Working Height	20 ft
Overall Width	18 inch
Material	Light Weight Fiberglass
Weight	44.9 lbs.
Steps/Rung Dimension	1.8 inch
Rung Type	D-Rung
Number of Rungs	1 x 20
Top to Bottom Rungs	18 ft
Rung Material	Aluminum alloy with anti-slip coating.
Load Capacity	300 lbs.
Foot Design	Slip-resistant shoe/Slip-resistant shoe with Shu-Lok & reg, feature, and spur plate
Standard	ANSI A14.4-1982
