UST-SF04R

Forked Webbing Lanyard

Enhance your fall protection with our Forked Webbing Lanyard. Crafted for versatility and safety, this lanyard features a durable webbing design with forked legs, providing secure attachment points. The energy-absorbing properties ensure a controlled descent, making it an essential tool for working at heights. Compact, lightweight, and compliant with safety standards, our Forked Webbing Lanyard is the reliable choice for professionals prioritizing safety and freedom of movement

Features:

- Constructed from high-strength and durable webbing material.
- Integrated energy-absorbing element to reduce the impact forces in the event of a fall.
- Secure connectors with self-locking mechanisms for quick and reliable attachment to the harness and anchor point.
- Meets relevant safety standards such as ANSI & OSHA.

Standard Parameters:

Snap Hook Opening	22 mm
Breaking Strength of Snap Hook	20 kN
Lanyard Material	Nylon
