

MECHANICAL COMPRESSION TOOL

Updated Product

USTools Mechanical Compression Tools

- The fixed dies "O" and "D" ensure consistent and precise shaping of the material.
- The compression tool is built to withstand repeated use and high pressures.
- Can be adapted for different applications by changing the material and adjusting the compression parameters.

UST-TC2042

STANDARD PARAMETER

Force	50 kN
Handle	Hickory Handle
Includes	2 fixed dies "O" & "D"
Type	Manual
Grip Type	Ergonomic
Sturdy Die	Die W-BG
Compliance	OSHA & ASTM

The compression tool is designed for shaping materials using compression molding techniques. It consists of a sturdy die (Die W-BG) made from durable materials capable of withstanding high pressure. Crafted with meticulous attention to detail, this crimping tool is engineered to deliver consistent and reliable crimps with every use.

Note: For Quality Reason, we have the right to change the color or design of the tools without any prior notice.
