

## **UST-RS127-S**

## **Updated Product**

- Made from synthetic fibers, typically polypropylene or nylon, offering high strength and durability.
- Designed to withstand heavy loads and harsh conditions, making it suitable for towing, lifting, and securing items.
- Despite its strength, the synthetic material keeps the rope lightweight, which is advantageous for portability and ease of handling.
- Resistant to moisture, UV rays, and chemicals, ensuring reliable performance in diverse weather conditions.

UST-RS127-S Synthetic Rope can provide higher breaking load up to 3390 lbs. (1537 Kgs), working load up to 840 lbs. (381 Kgs)

STANDARD PARAMETER	
Features	Lightweight, cost-effective, and abrasion resistant
Strand No.	3 nos.
Material	Polypropylene or nylon, offering high strength and durability
Diameter	1/2" (1.27 cm)
Strength	Withstand heavy loads and harsh conditions
<b>Breaking Load</b>	3390 lbs. (1537 Kgs)
Weather Resistance	Moisture, UV rays, and chemicals
Working Load	840 lbs. (381 Kgs)
Versatility	Outdoor activities including camping, hiking, boating, and off-road recovery
Weight/100'	5 lbs. (2.3 Kgs)
Visibility	Bright yellow color enhances visibility
Length/Coil	300'/ 400'/500'/600'/700'/800

- Suitable for various outdoor activities including camping, hiking, boating, and off-road recovery.
- The bright yellow color enhances visibility, making it easier to locate and use, especially in low light conditions.
- Synthetic ropes typically have a smooth texture, making them easier to knot and manipulate for various applications.
